API Key Public

021d075e6fe16dc681a0

The API Key above should not be shared (although it is public). If someone steals or finds your API Key, they will not be able to login to your account or access private information.

API Key Offers

f24063d0d801e4daa846e9da4454c467

The API Key above can be used to request offers from our system.

Offer Feed

The offer feed returns 10 offers for the target visitor in JSON format.

```
https://d2xohqmdyl2cj3.cloudfront.net/public/offers/feed.php?l
```

Example Code:

```
<div id="offerContainer"></div>

<!--WARNING - THIS IS AN OLD JQUERY VERSION-->
<script
src="https://ajax.googleapis.com/ajax/libs/jquery/1.12.4/
jquery.min.js"></script>
<script type="text/javascript">
$(function() {

$.getJSON("https://d2xohqmdyl2cj3.cloudfront.net/public/o
ffers/feed.php?
user_id=518705&api_key=f24063d0d801e4daa846e9da4454c467&s
1=&s2=&callback=?",
            function(offers){
                var html = '';
                var numOffers=5; //Change
                to trim offers. Max is 10.

                offers=offers.splice(0,numOffers);
                $.each(offers,
                function(key, offer){
                    html += '<div><a
                    href="'+offer.url+'" target="_blank"
                    title="'+offer.conversion+'">' +offer.anchor+ '</a></div>';
                });
                $("#offerContainer").append(html);
            });
        });
</script>
```

Get Variables	Default	Description
user_id (*required)	None	Your user ID.
api_key (*required)	None	Your offers API Key.
ip	IP of request-maker.	Send a specific ip address to geo-target that ip for offers.
user_agent	User-agent of request-maker.	Send a specific user-agent to get offers specific for that device.
s1	None	Sub ID 1 to add to offer urls.
s2	None	Sub ID 2 to add to offer urls.
callback	None	Javascript callback function. If omitted, feed will show plain JSON. Note: Most javascript JSONP functions add this for you.

(Optional) Check For Lead Completion

You may want to check if the visitor has completed a lead. The script below will grab visitor leads every 15 seconds.

Example Code:

```
<script type="text/javascript">
    setInterval(checkLeads, 15000); //Check for leads
    every 15 seconds
    function checkLeads() {
        //Don't forget, jquery is required for
        $.getJSON

        $.getJSON("https://d2xohqmdy12cj3.cloudfront.net/public/e
        xternal/check2.php?testing=0&callback=?",
        //Hint: change
        to testing=1 for test leads
        function (leads) {
            var completed_leads =
            leads.length;
            if (completed_leads) {
                var offer_ids =
                [];
                var
                earnings_in_cents = 0;
                $.each(leads,
                function (key, lead) {
                    offer_ids.push(parseInt(lead.offer_id));
                    earnings_in_cents += parseFloat(lead.points);
                    console.log("Single lead on offer id " + lead.offer_id +
                    " for $" + (parseFloat(lead.points) / 100).toFixed(2));
                });
                console.log("SUMMARY: User has completed " +
                completed_leads + " leads, for $" + (earnings_in_cents /
                100) + " earnings, on offer ids: " +
                offer_ids.join(","));
            }
            else {
                console.log("No
                leads were found");
            }
        });
    }
</script>
```
